

All forms of Gold ownership were NOT created equal.

Earn a **GUARANTEED 2%** a year above the current Gold price on your holdings.

So you've made the decision to diversify your portfolio to include Gold and that decision has paid off handsomely. Now what?

If you have owned Gold since 2004, you have experienced exceptional returns, but long term ownership of precious metals presents unique challenges.

- As the value of precious metals increases, so do your holdings – but you would have to sell those assets in order to realize the gain.
- A small deceleration in the meteoric rise in price of precious metals, a period of flat prices or even short term declines in price can quickly erode your superior returns for the past ten years.

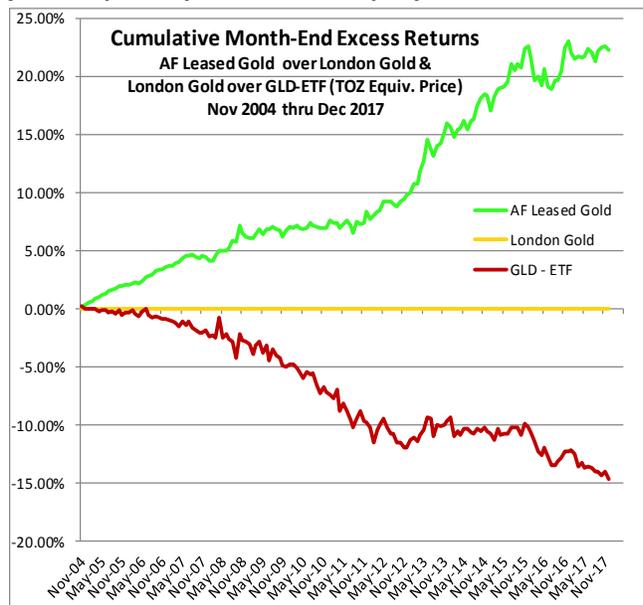

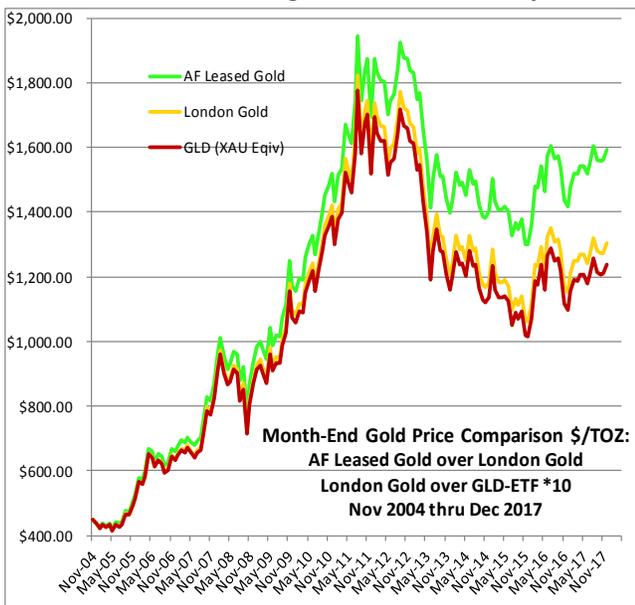

Would you buy an apartment building and then NOT rent out the apartments? Didn't think so.

What if, as an owner of precious metals, you could maximize your potential return by lending your holdings to the market in exchange for a guaranteed income stream?

See www.afmetals.com/PMdLP

How would you like to retain full ownership of your precious metals while earning income? Why not maximize your potential return on that investment by lending your holdings to the market in exchange for a guaranteed income stream?

The **Alliance Precious Metals Deposit Lease Program (PMdLP)** allows you to retain full ownership of your Gold while generating a minimum of 2% per year in Lease Fee income above any gain or loss you may realize from owning precious metals. **You could earn a guaranteed return on your Gold of \$25.73 per Troy Ounce or more per year***

Compound that \$25.73 over a 10-year holding period and – regardless of whether the price of your Gold goes up, down or stays flat – you could realized up to an extra \$257 per Troy Ounce in Lease Fee Income*. That is almost 22% in Excess Real Returns compared to London Gold and almost 37% in Excess Real Returns compared to the GLD-ETF on the value of your holdings since November 2004. Should Gold continue its meteoric price rise Lease Fees earned from your PMdLP Investment can provide you with additional income on top of the profits you would realize from owning Gold! Should the price of Gold drop, your PMdLP Lease Fee Income can offset some or all of your market losses from a price decline!**
